Initial drill program at Hillview

The directors of Encounter Resources Ltd are pleased to announce that drilling has commenced at the company's Hillview project (E51/1127 - Encounter 80%, Avoca Resources Ltd 20%).

The Hillview project is located 50km south east of Meekatharra. Historical uranium exploration at Hillview, by Western Mining Corporation in the 1970's, identified a 15km long zone of near surface uranium mineralisation. Historical drill sections were between 1.6kms and 2kms apart with holes intersecting between 100-300ppm eU₃O₈ on every traverse within the defined 15km trend. The initial 80 hole aircore program to be drilled by Encounter Resources will involve a series of drill traverses along existing station tracks.

McPherson's Bore

The aircore drill program at the McPherson's Bore project (ASX announcement 13 June 2007) has been completed, the final batch of samples have been submitted for assay with results expected before the end of the month.
